WETH-R-STRIP

INSULATED STOP

MAGNET-STOP

Since 1957, PortaSeal has been manufacturing fine weather-stripping products.

Our **MAGNET-STOP** product provides the total airtight seal for *metal doors* employed on refrigerator doors!

PortaSeal's **MAGNET-STOP** is a quality full wood doorstop with a magnetic-core sealing gasket, designed for use with metal-clad exterior doors.

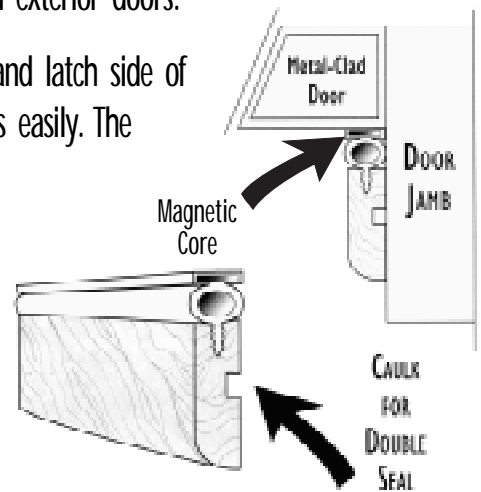

**MAGNET-STOP** literally clings to the header and latch side of your door with a vacuum-like grip, yet releases easily. The hinge side is sealed with a high quality PortaSeal flexible vinyl stop. Simply nail on!

The sections are clearly marked for accurate installation and are primed. The side stops are pre-coped on both ends for easy mounting either for left or right swinging doors.

Each pre-packed, retail set contains one 3' header and two 7' side stops in a clearly marked poly bag with instructions, 9 sets per carton.

PortaSeal makes other fine weather-stripping products designed for customer satisfaction and high profits.

Check out our **INSULATED DOOR-STOP**, **WETH-R-STRIP**, **GARA-SEAL** and **GARA-BOTTOM** products, only from PortaSeal!

PORTASEAL products sell themselves in our retail rack.
